GramVest

The Rural Decision Engine

“Know your market, your competition, and your capital — before you invest a single rupee.”

- Team:

Team GramVest
- Theme:

Rural Entrepreneurship & Market Intelligence | MSME & Agri-Business
- Mission:

AI-Driven Hyper-Local Business Advisory & Concessional Scheme Structuring

CORE INNOVATION

Dual-Engine Decision System

- 

Hyper-Local GIS Radar: 5–10km catchment demand & competitor density
- 

10% / 90% Scheme Router: Micro Finance vs. Term Loan auto-structuring
- 

Deterministic Financial Truth: No hallucinated loan or EMI numbers
- 

Bank-Ready DPR Dossier: One-click bankable feasibility report

Rural entrepreneurs invest blind

The government provides 90% concessional credit with only 10% beneficiary margin. Yet, thousands of rural micro-enterprises stagnate or default within Year 1 due to two fatal blind spots: zero localized market intelligence and intimidating financial illiteracy.

THE BOTTLENECK: Capital is available via SCAs and CAs, but institutional-grade feasibility intelligence has never reached the village doorstep.

One platform. Every decision a rural founder needs.

GramVest is a multilingual AI-driven advisory system and smart financial router. By taking 3 simple inputs, it instantly delivers hyper-local feasibility validation and bank-grade loan structuring in under 5 minutes.

MODULE 1 · PROBLEM REQUIREMENT

Hyper-Local Business Feasibility Engine

- ✓ **Market Reach:** 5–10km radius catchment population and distribution channels.
- ✓ **Opportunity Analysis:** Pinpoints unserved demand gaps and product deficits.
- ✓ **Evidence-Based SWOT:** Objective strengths & weaknesses tied to local economic facts.
- ✓ **Threats & Competitor Mapping:** Real rival

MODULE 2 · PROBLEM REQUIREMENT

Smart Scheme Calculator & Financial Router

- ✓ **Deterministic 10x Structuring:** Auto-derives Project Cost = Margin / 10% (90% Loan).
- ✓ **Rule-Based Scheme Routing:**
 - Project Cost ≤ ₹1.40L → **Micro Finance Scheme** (6.5% interest, 3-yr tenure, 3-mo moratorium)
 - Project Cost ₹1.40L–₹50L → **Term Loan Scheme** (8.0% interest, 7-yr tenure,

Seamless Decision Flow: From Input to Sanction

How raw user parameters flow through spatial intelligence, deterministic math, and grounded RAG to produce an actionable business advisory.

PROCESS WORKFLOW

End-to-End User JourneyGramVest | Smart India Hackathon 2026

1 **User Input Layer**
Location (Gram Panchayat / Block), Available Capital (e.g. ₹1,00,000), Proposed Category (Dairy, Retail, Agro).

2 **Data Engine & GIS Ingestion**
Fetches spatial 5–10km catchment, demographic density, local mandi prices, and economic indicators.

3 **Feasibility & Threat Scoring**
Evaluates competition headroom, saturation index, supply vulnerabilities, and generates evidence-backed SWOT.

4 **Deterministic Financial Engine**
Computes Project Cost (₹10L), Loan (₹9L), quarterly EMI, operational margins, break-even point, and DSCR.

5 **Scheme Router & Grounded AI Advisor**
Matches exact CSC/NGO schemes against user capital and location.

Deterministic Software Core + Grounded AI Layer

Engineered for institutional trust. Numerical calculations are strictly deterministic; generative AI is used exclusively for grounded multilingual explanations.

Golden Engineering Principle: “AI explains; software calculates.” No hallucinated EMI or interest rates.

**100%
AUDITABLE
MATH**

Roadmap Beyond the Hackathon

A clear 4-stage evolutionary path to transform GramVest from a competitive hackathon prototype into national digital public infrastructure.

FUTURE
SCOPE

Scalability & Post-Hackathon
Roadmap

GramVest | Smart India
Hackathon 2026

PHASE 1 ·
NEAR TERM

Vernacular
Voice AI
(Bhashini)

Integration with Government of India's Bhashini API for voice-in/voice-out in Hindi, Punjabi, Marathi, Tamil, and Bengali. Eliminates literacy barriers for rural artisans and women SHGs.

🎯 Impact:
Zero-
literacy
accessibility

PHASE 2 ·
STRATEGIC

Direct SCA
& Bank API
Integration

Direct digital integration with State Channelizing Agencies (SCAs), JanSamarth portal, and public sector banks for seamless 1-click loan dossier submission and real-time sanction tracking.

🎯 Impact:
Paperless
loan
appraisals

PHASE 3 ·
INTELLIGENCE

Satellite &
IoT Agro
Data

Ingesting ISRO Bhuvan & Copernicus satellite imagery for real-time soil health, crop maturity cycles, and mandi demand spikes to power precision agri-business feasibility models.

🎯 Impact:
Real-time
supply
analytics

PHASE 4 ·
SUSTAINABILITY

Post-
Sanction
WhatsApp
Bot

Continuous lightweight WhatsApp micro-advisory tracking quarterly repayment reminders, raw material cost surges, and working capital health to prevent enterprise mortality.

🎯 Impact:
Default
prevention &
NPL reduction

De-risking Grassroots Lending Across Bharat

GramVest replaces weeks of anecdotal guesswork with minutes of institutional-grade financial clarity, empowering marginalized entrepreneurs and protecting public capital.

65%

Rural Population Reach

Location-agnostic engine designed to scale across all 6,00,000+ Indian villages.

Weeks → 5m

Time to Feasibility

Slashes business evaluation time from 3 weeks of manual inquiry to under 5 minutes.

₹0

Consulting Cost

Replaces expensive ₹15,000–₹50,000 consultants with free, institutional-grade AI advisory.

90% : 10%

Deterministic Scheme Clarity

Exact debt-equity structuring, elimination of surprise shortfalls, and higher bank sanction rates.

“Every village has a market. GramVest helps rural India see it clearly.”

Ready to empower the next 10 million rural micro-enterprises with data-backed conviction.
