GramVest

The Rural Decision Engine

Know your market, your competition, and your capital — before you invest a single rupee.

Team GramVest

Theme: Rural Entrepreneurship & Market Intelligence | MSME & Agri-Business Empowerment

Rural entrepreneurs invest blind

Every year, thousands of first-time rural entrepreneurs sink their life savings into a business — a dairy unit, a retail shop, a cold store — with almost no reliable data on demand, competition, or financial fit for their exact location.

1

No local market visibility

Urban-centric market research tools don't cover villages and small towns — entrepreneurs can't see local demand or unserved gaps.

2

Competition is invisible

No easy way to know how many similar businesses already operate nearby, or how saturated the local market really is.

3

Financing is confusing

Government schemes like PMEGP exist, but subsidy eligibility, DSCR, and bank documentation feel out of reach without expert help.

4

High failure, low guidance

Without feasibility data, many rural ventures fail within the first year — and there is no affordable advisor to turn to.

One platform. Every decision an investor needs.

GramVest turns any village or town into a live, data-backed business dashboard. Enter your business idea, location, and available capital — GramVest instantly analyzes the market, competition, risk, and financial fit, and hands you a bank-ready feasibility report.

Nine modules, one seamless workspace

M

Market & Competitor Radar

Geospatial 5–10km catchment map of demand, households & rival businesses

O

Opportunity Engine

Scores demand deficit, competition headroom, capital fit & market access

!

Risk & Mitigation Log

Real operational threats, severity-ranked, each with an actionable fix

F

Feasibility Verdict

Weighted 0–100 score blending market, operations, finance & risk

₹

Capital & Cash Flow

Project cost, EMI, break-even point & 12-month cash flow projection

B

Financing & Subsidy Match

Recommended loan route, subsidy eligibility & document checklist

AI

AI Advisor Chatbot

Ask anything — grounded in local mandi, price & subsidy data

W

What-If Stress Simulator

Test feed costs, demand & pricing shocks against your DSCR

R

Bank-Ready Report

One-click DPR-format feasibility dossier, ready for loan submission

cut in time-to-insight for a first-time entrepreneur's feasibility check

1 Report

bank-ready DPR that plugs directly into PMEGP & MSME loan workflows

Beyond individual entrepreneurs, GramVest strengthens the pipeline of bankable rural DPRs for banks, NBFCs, District Industries Centres and State Rural Livelihood Missions — improving loan sanction quality and reducing MSME failure rates at source.

Serving both entrepreneurs and the institutions behind them

Primary Users

- First-time rural entrepreneurs & small business owners
- Women self-help groups (SHGs) exploring micro-enterprises
- Returning migrant workers seeking local livelihoods
- Farmers diversifying into agri-processing & allied businesses

Institutional Partners

- Banks & NBFCs — better quality, pre-vetted loan pipelines
- District Industries Centres (DIC) — faster PMEGP appraisals
- State Rural Livelihood Missions — data-backed livelihood planning
- Business Model: free for entrepreneurs; institutional licensing & DPR-verification partnerships for banks and government bodies

Roadmap beyond the hackathon

Phase 1

Multi-Sector Expansion

Extend feasibility models beyond dairy to agri-processing, retail, and rural services

Phase 2

Regional Language & Voice

Punjabi, Hindi and other regional voice interfaces for low-literacy accessibility

Phase 3

Direct Bank Integration

API tie-ups with PSU banks & NBFCs for in-app loan application and tracking

Phase 4

Satellite & IoT Data

Live crop, land-use and soil data for even sharper agri-business feasibility

Every village has a market.
GramVest helps rural India see it clearly.

Thank You
